LEBANON SUBSTITUTION DRUG LIST

**Preliminary Edition
2014**

Ministry of Public Health of Lebanon

Editors

Rita KARAM, *Pharm D. PhD.*
Diana CHARBEL, *Pharm D.*
Ghassan HAMADEH, *MD. CPE*

Acknowledgments

This Substitution Drug list was made possible with the help and support of many stake holders. We wish to acknowledge the following specifically:

1. Minister of Public Health Mr. Wael Abou Faour and Director General Dr. Walid Ammar
2. Ministry of Public Health staff in the Pharmacy Service headed by Dr. Colette Raidy
3. Dr. Myriam Watfa who helped in collection and revision of data.

Foreword

A Generic drug is, according to the World Health Organization, a pharmaceutical product, usually intended to be interchangeable with an Innovator product that is manufactured without a license from the innovator company and marketed after the expiry of the patent or other exclusive rights. The generic products are considered equivalent to innovator products if they contain the same active ingredient, the same dosage form, the same strength, the same route of administration and must demonstrate Bioequivalence.

Concerns have arisen with respect to the Generic products, regarding their effectiveness, safety and interchangeability with the Innovator product. This prompted the Ministry of Public Health to take actions to restore confidence in generic products that are submitted to the most stringent measures to ensure the quality of these products.

According to the Law No. 91 issued on 2010 related to the Pharmacist substitution right, the Ministry of Public Health conceived the Substitution Drug list. It is presented as a scientific, objective, reliable, accurate and accessible listing. This list is a helpful tool for Pharmacists and Health professionals and an information tool for patients as well.

The Substitution Drug List was compiled by a team of Pharmacists and Physicians from the Ministry of Public Health. It was inspired by the French Repertory of Generic Groups and the Lebanese National Drug Index (LNDI) which is the reference Guide for medicines in Lebanon.

The substitution could be done either between an innovator product and a generic one, or between two generic products.

This Substitution Drug List lists drugs, dosage forms, package sizes, drug strengths and other information registered at the Ministry of Public Health. It is divided into sections based on the Anatomical Therapeutic Chemical (ATC) classification system. The Innovator product is listed before the Generic products.

Information is shown in a convenient format with trade information in italics:

| | | | | | |
|---|------|-----------|--------------------------|-------------------------------------|-----------------------------|
| ATCcode | | | | | |
| Trade Name & Strength | | | B=Brand G=Generic | | |
| Route | Form | Container | Presentation | Code MOPH | Registration Number at MOPH |
| Active Ingredients with their respective dosage | | | | | |
| <i>Agent importing product</i> | | | <i>Manufacturer</i> | <i>Country of Origin</i> | |
| | | | <i>Responsible Party</i> | <i>Country of Responsible Party</i> | |

Each medication listing contains the following information:

- ATC classification and code.
- Trade name and strength of the formulation as registered at the Ministry of Public Health (MOH)
- Generic (G) or Brand product (B)
- Composition of the marketed form with the corresponding dosage of each active ingredient.
- Form & presentation.
- The local importer (agent), manufacturer and identified country of origin.

- The Responsible Party and identified country.
- The Ministry of Public Health database serial number (Code MOH) and legal registration document number (MOH reg)

The Substitution Drug List can be accessed from the official website of the Ministry of Public Health: www.moph.gov.lb

The Substitution Drug List welcomes comments from healthcare professionals. Please send comments to: mphealth@cyberia.net.lb
